orcharhino

DEPLOY · RUN · CONTROL SIMPLIFY YOUR DATACENTER

The Enterprise Lifecycle Management Tool

orcharhino is THE solution for data center orchestration! With our tool, you can automate your deployment and configuration management as well as your lifecycle and patch management. Use orcharhino to standardize your data center and manage your infrastructure in the cloud or on premises through a unified interface. You can even manage desktop computers and IoT devices with it. Finally, more time for other projects!

Management
Manage hundreds or even thousands of systems with one interface as if it were just one system

Deployment
Create new systems with just one mouse click or an API call—as a virtual machine, on bare-metal servers, or in the cloud

Configuration
Automate the configuration of your managed hosts: roll out changes, analyze deviations, and fix them with just one click
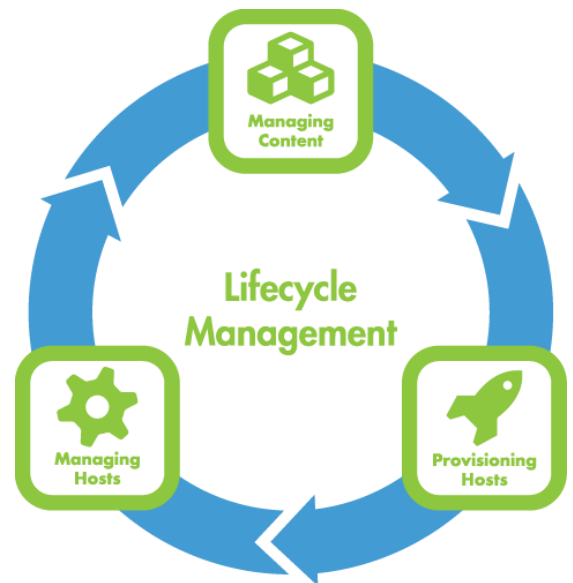

Software Release
Manage software in multiple levels from development to production, and automate security fixes and updates using Errata

Reporting
Keep track of current patch levels as well as system security and track changes

Lifecycle Management — Managing Content, Provisioning Hosts, Managing Hosts

"An orcharhino subscription means access to the tested releases and updates, to the connection of Linux hosts and the support portal!"
*- Mark Hlawatschek, CEO, ATIX AG*

What are the advantages of orcharhino?

- Reduced administration costs
- Error prevention through automation
- Simple and clear system settings
- Significantly faster development of new solutions (time to market)
- More system stability and security

Why orcharhino?

- Enterprise solution
- Manufacturer independence
- Consulting and engineering
- Training and support
- High flexibility

What is the next step?

We will fulfill your wishes regarding your technical requirements, and we will get in touch with you within 24 hours—that way, you can start planning at an early stage. Leave it to us, and we will prepare the perfect start with orcharhino for you.

Trust is good—references are better!
